Net revenue increased by 14.9% year-over-year to RMB 2.98 billion, marking the 15th consecutive quarter of year-over-year growth for 111 since our NASDAQ IPO. The B2B segment achieved year-over-year revenue and segment profit increases by 17.0% and 90.7%, respectively. Our market coverage from both upstream and downstream is increasing and customer loyalty continues to grow."

Mr. Liu added, "In addition to topline growth, our gross segment profit grew 4.4 times as fast as our revenue in the first quarter. Gross segment profit grew by 66.3% year-over-year, and as a percentage of net revenues, our gross segment margins⁽³⁾ improved to 6.5% as compared to 4.5% in the same quarter of last year. As a result, non-GAAP loss from operation as a percentage of net revenues decreased from 5.2% in the first quarter of 2021 to 2.4% in the first quarter this year."

"We will continue to flawlessly execute our growth strategy and we are committed to steadily expand our revenue and gross segment profit. We remain resolute on our goal to reach quarterly break-even at the non-GAAP operating income level in 2022."

Cost of service revenue is recorded in the operating expense.

Operating costs and expenses were RMB3.1 billion (US\$486.6 million), representing an increase of 11.5% from RMB2.8 billion in the same quarter of last year.

- **Cost of products sold** was RMB2.8 billion (US\$440.1 million), representing an increase of 12.5% from RMB2.5 billion in the same quarter of last year. The increase was in line with the revenue growth.

As of March 31, 2022, the Company has cash and cash equivalents, restricted cash and short-term investments of RMB901.4 million (US\$142.2million), compared to RMB943.2 million as of December 31, 2021.

Use of Non-GAAP Financial Measures

In evaluating the business, the Company considers and uses non-GAAP loss from operations, non-GAAP net loss, non-GAAP net loss attributable to ordinary shareholders, and non-GAAP loss per ADS, as supplemental measures to review and assess its operating performance. The Company defines non-GAAP loss from operations as loss from operations excluding share-based compensation expenses. The Company defines non-GAAP net loss as net loss excluding share-based compensation expenses, net of tax. The Company defines non-GAAP net loss attributable to ordinary shareholders as net loss attributable to ordinary shareholders excluding share-based compensation expenses, net of tax. The Company defines non-GAAP loss per ADS as net loss attributable to ordinary shareholders per ADS excluding share-based compensation expenses, net of tax per ADS. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP.

The Company believes that non-GAAP loss from operations, non-GAAP net loss, non-GAAP net loss attributable to ordinary shareholders, and non-GAAP loss per ADS help identify underlying trends in its business that could otherwise be distorted by the effect of certain expenses that it includes in loss from operations and net loss. Share-based compensation expenses is a non-cash expense that varies from period to period. As a result, management excludes the items from its internal operating forecasts and models. Management believes that the adjustments for share-based compensation expenses provide investors with a reasonable basis to measure the company's core operating performance, in a more meaningful comparison with the performance of other companies. The Company believes that non-GAAP loss from operations, non-GAAP net loss, non-GAAP net loss attributable to ordinary shareholders, and non-GAAP loss per ADS provide useful information about its operating results, enhances the overall understanding of its past performance and future prospects and allow for greater visibility with respect to key metrics used by the management in their financial and operational decision-making.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using non-GAAP loss from

operations, non-GAAP net loss, non-GAAP net loss attributable to ordinary shareholders, or non-GAAP loss per ADS is that it does not reflect all items of income and expense that affect the Company's operations. Further, the non-GAAP financial measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.

The Company compensates for these limitations by reconciling the non-GAAP financial measures to the most comparable U.S. GAAP measures, all of which should be considered when evaluating the Company's performance. The Company encourages you to review its financial information in its entirety and not rely on a single financial measure.

Reconciliation of the non-GAAP financial measures to the most comparable U.S. GAAP measures is included at the end of this press release.
